

# Advanced Therapy Solutions

growth. passion. convenience.

Our goal is to provide the highest quality therapy services to children in order to help them achieve their dreams.

We strive to provide this goal by adhering to our three core values:

**growth. passion. convenience.**

**growth**— [grŌTH] :

Webster Dictionary Definition: the act or process or a manner of growing; development; gradual increase:

**Advanced Therapy Definition: Development of skills in each individual child's area of need.**

**passion**—[paSHən]:

Webster Dictionary Definition: a strong feeling of enthusiasm or excitement for something or about doing something.

**Advanced Therapy Definition: Dedication by each of our team members to ensure that every child is provided the best tools to achieve their goals.**

**convenience**—[kən'vēnyəns]:

Webster Dictionary Definition: a quality or situation that makes something easy or useful for someone by reducing the amount of work or time required to do something

**Advanced Therapy Definition: Flexibility in locations and schedule to accommodate the needs of the child and parent.**

## OCCUPATIONAL THERAPY

Our OT's work with children who have delays with fine motor, visual motor, perceptual, sensory processing, cognition, visual motor, activities of daily living, social and academic skills. Using intrinsically motivating ideas and practical activities our occupational therapists help children achieve their OT goals.

## SPEECH THERAPY

Our speech therapists work with children who have delays with language, fluency, receptive and expressive language, oral motor, articulation, swallowing, stuttering, cognition, and social communication and educational skills. Our dedicated and passionate speech therapists help children achieve their therapy goals with their talent and creativity.
